Unlock the Power of Copper with CUPRAVITE

CUPRAVITE is a high-quality, water-soluble copper fertilizer that quickly corrects copper deficiencies. Its liquid form ensures fast absorption through foliar or fertigation use, helping crops grow healthier, stronger, and more productive.

Appearance: Blue Liquid

pH Range: 3 – 5

Copper (Cu) Content: 8%

Density: 1.30 g/cm³

Application Guidelines

Foliar Application

Use 75–150 cc per 100 liters of water. Apply 2 to 3 times at 20-day intervals, starting at the onset of vegetation.

Fertigation

Use 3–6 liters per hectare throughout the crop cycle. For citrus and fruit trees, apply 4 to 6 times depending on deficiency severity. Do not exceed 0.05% concentration.
