ADVANTAGES AND PROPERTIES :

SANTALON is a normal liquid plant nutrient that provides plants with many of the necessary elements required for growth. It provides trace elements and plant nutrients which improves the general plant condition and is a valuable supplement to soil fertilizer programs, particularly where there are adverse conditions for the uptake of primary nutrients from the soil. Although the majority of the ingredient of SANTALON is Nitrogen, its Phosphorous and Potassium combination makes plants grow healthier, speeds up root formation and improves fruit quality.
